

CNWIRE
CORPORATION

Subsidiary of

ER-BAKIR
elektrolitik bakır mamülleri a.ş.

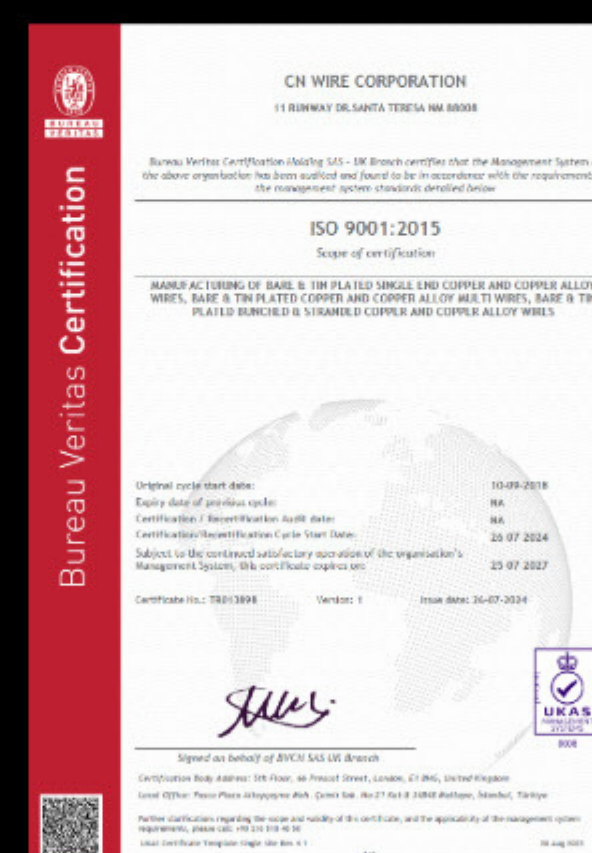

CN Wire Corporation is a world class copper wire manufacturer located in Santa Teresa, New Mexico. Our 260,000 sq-ft. state of the art manufacturing facility produces bare, tin plated and nickel plated copper wire conductors, which services all markets in the wire and cable industry. We are committed in providing a level service to its customers that makes us a market leader in the industry.

Our quality and service have contributed to our reputation and is the foundation of its success. Offering tailor-made solutions to meet each customer's unique needs, we strive for excellence in both service and product quality. We are dedicated to helping our customers meet their supply chain demands efficiently. Our dedicated and professional staff looks forward in servicing you.

ER-BAKIR

elektrolitik bakır mamüleri a.ş.

Er-Bakır , began operations in Denizli, in 1981, operates on a facility of total 200,000 square meters, with a covered area of 70,000 square meters. At this facility, Er-Bakır significantly contributes to both its stakeholders' and the country's economy by exporting its exclusive product range to more than 50 countries in 6 continents.

Er-Bakır has a strong presence worldwide with its well-known brand, superior quality and exceptional service. It is a global supplier of copper, copper alloy and aluminum conductor for many industries such as Energy, Telecommunication, Automotive, Medical, Aerospace and Aviation, Defense, Railway Systems and Renewable Energy.

As an indicator of very long experience coupled with superior quality, the company carries out its activities in accordance with international requirements of the ISO 9001, ISO 14001 for Environmental Management System (EMS), ISO 18001 for Occupational Health and Safety Management System, ISO 16949 for High Quality in Automotive Industry and in the name of today's most critical issue, ISO 27001 for Information Security.

In addition, thanks to the Authorized Economic Operator Certificate which is owned by a limited number of companies in the country and worldwide, the company has the capacity and authority to carry out customs clearance issues in both import and export business.

In the transmission of almost everything that is valuable for you, Er-Bakır products are used in most of the tools and utensils utilized in the conduction of energy, information, signal and heat. Er-Bakır will continue to be a globally recognized brand, not only of the region but of the whole country...

MONO WIRE

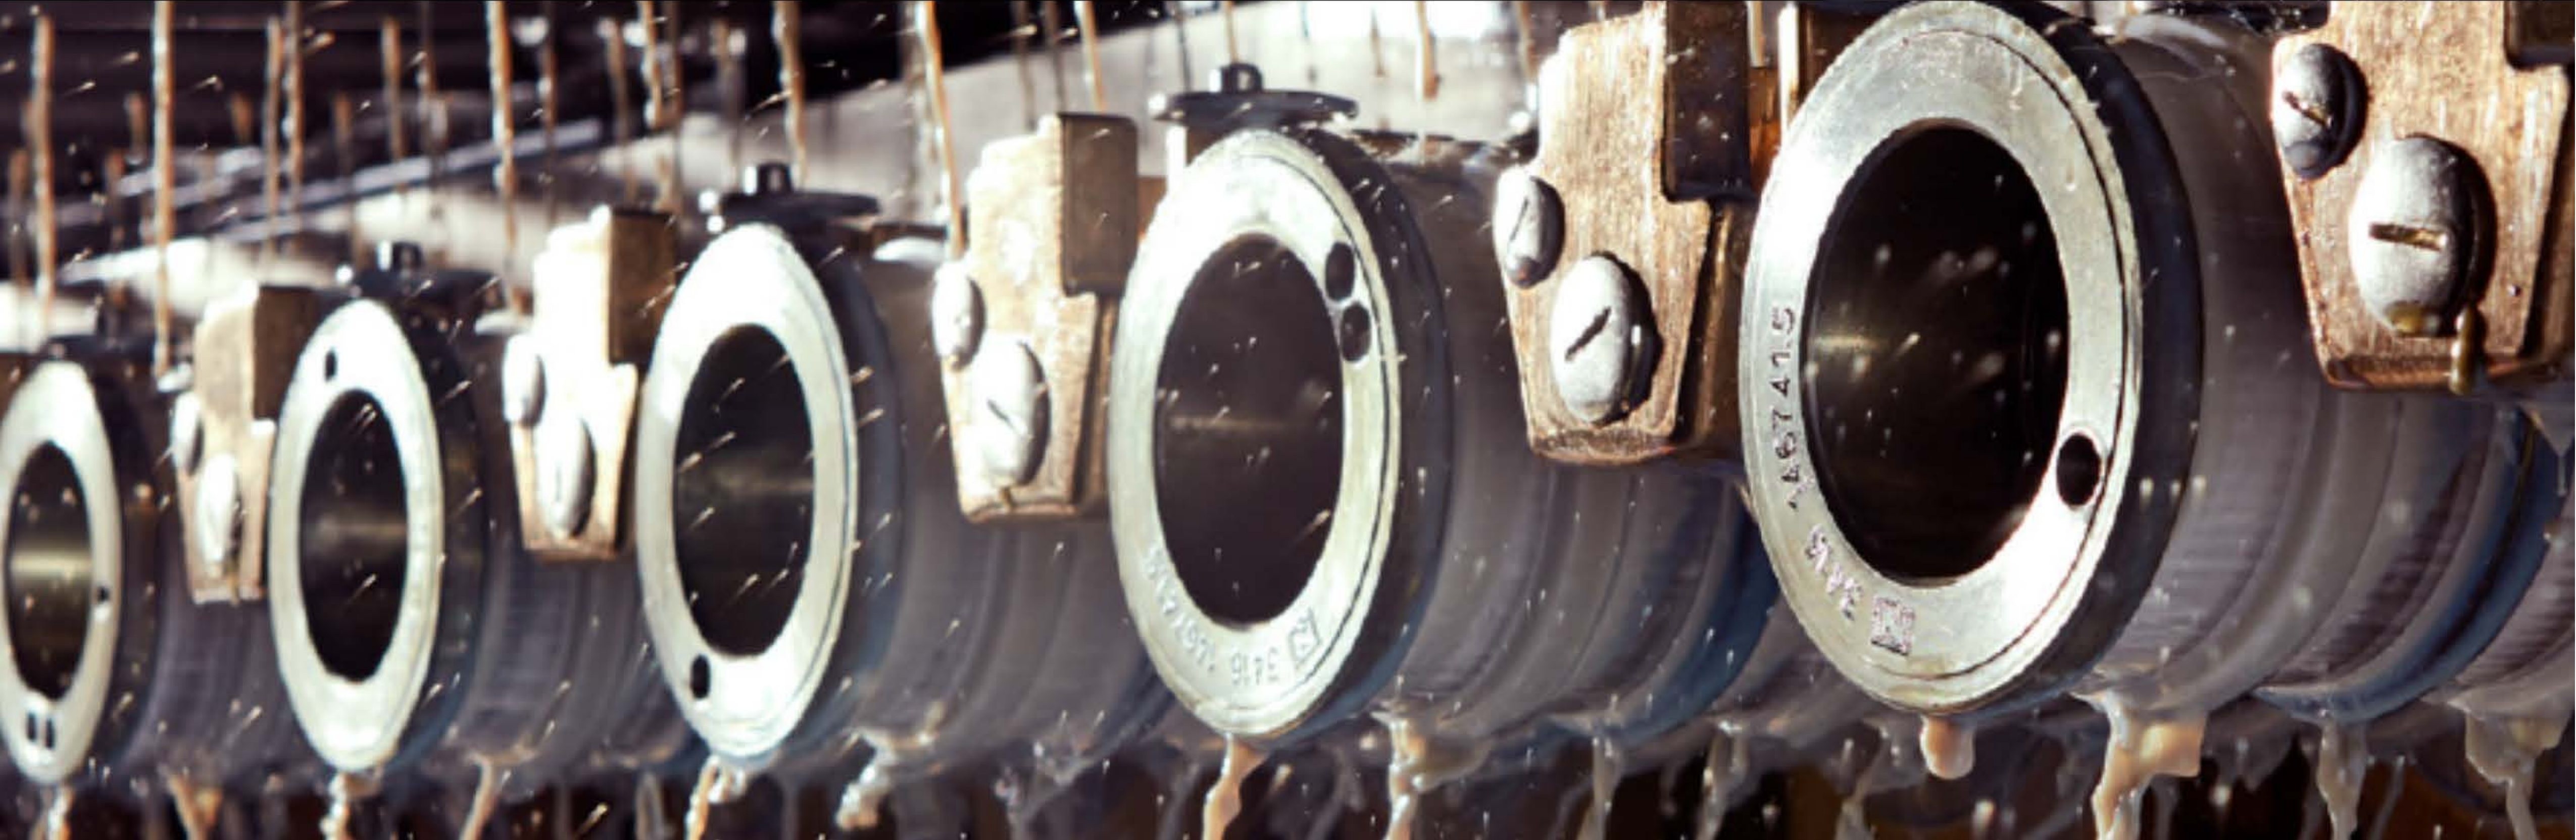

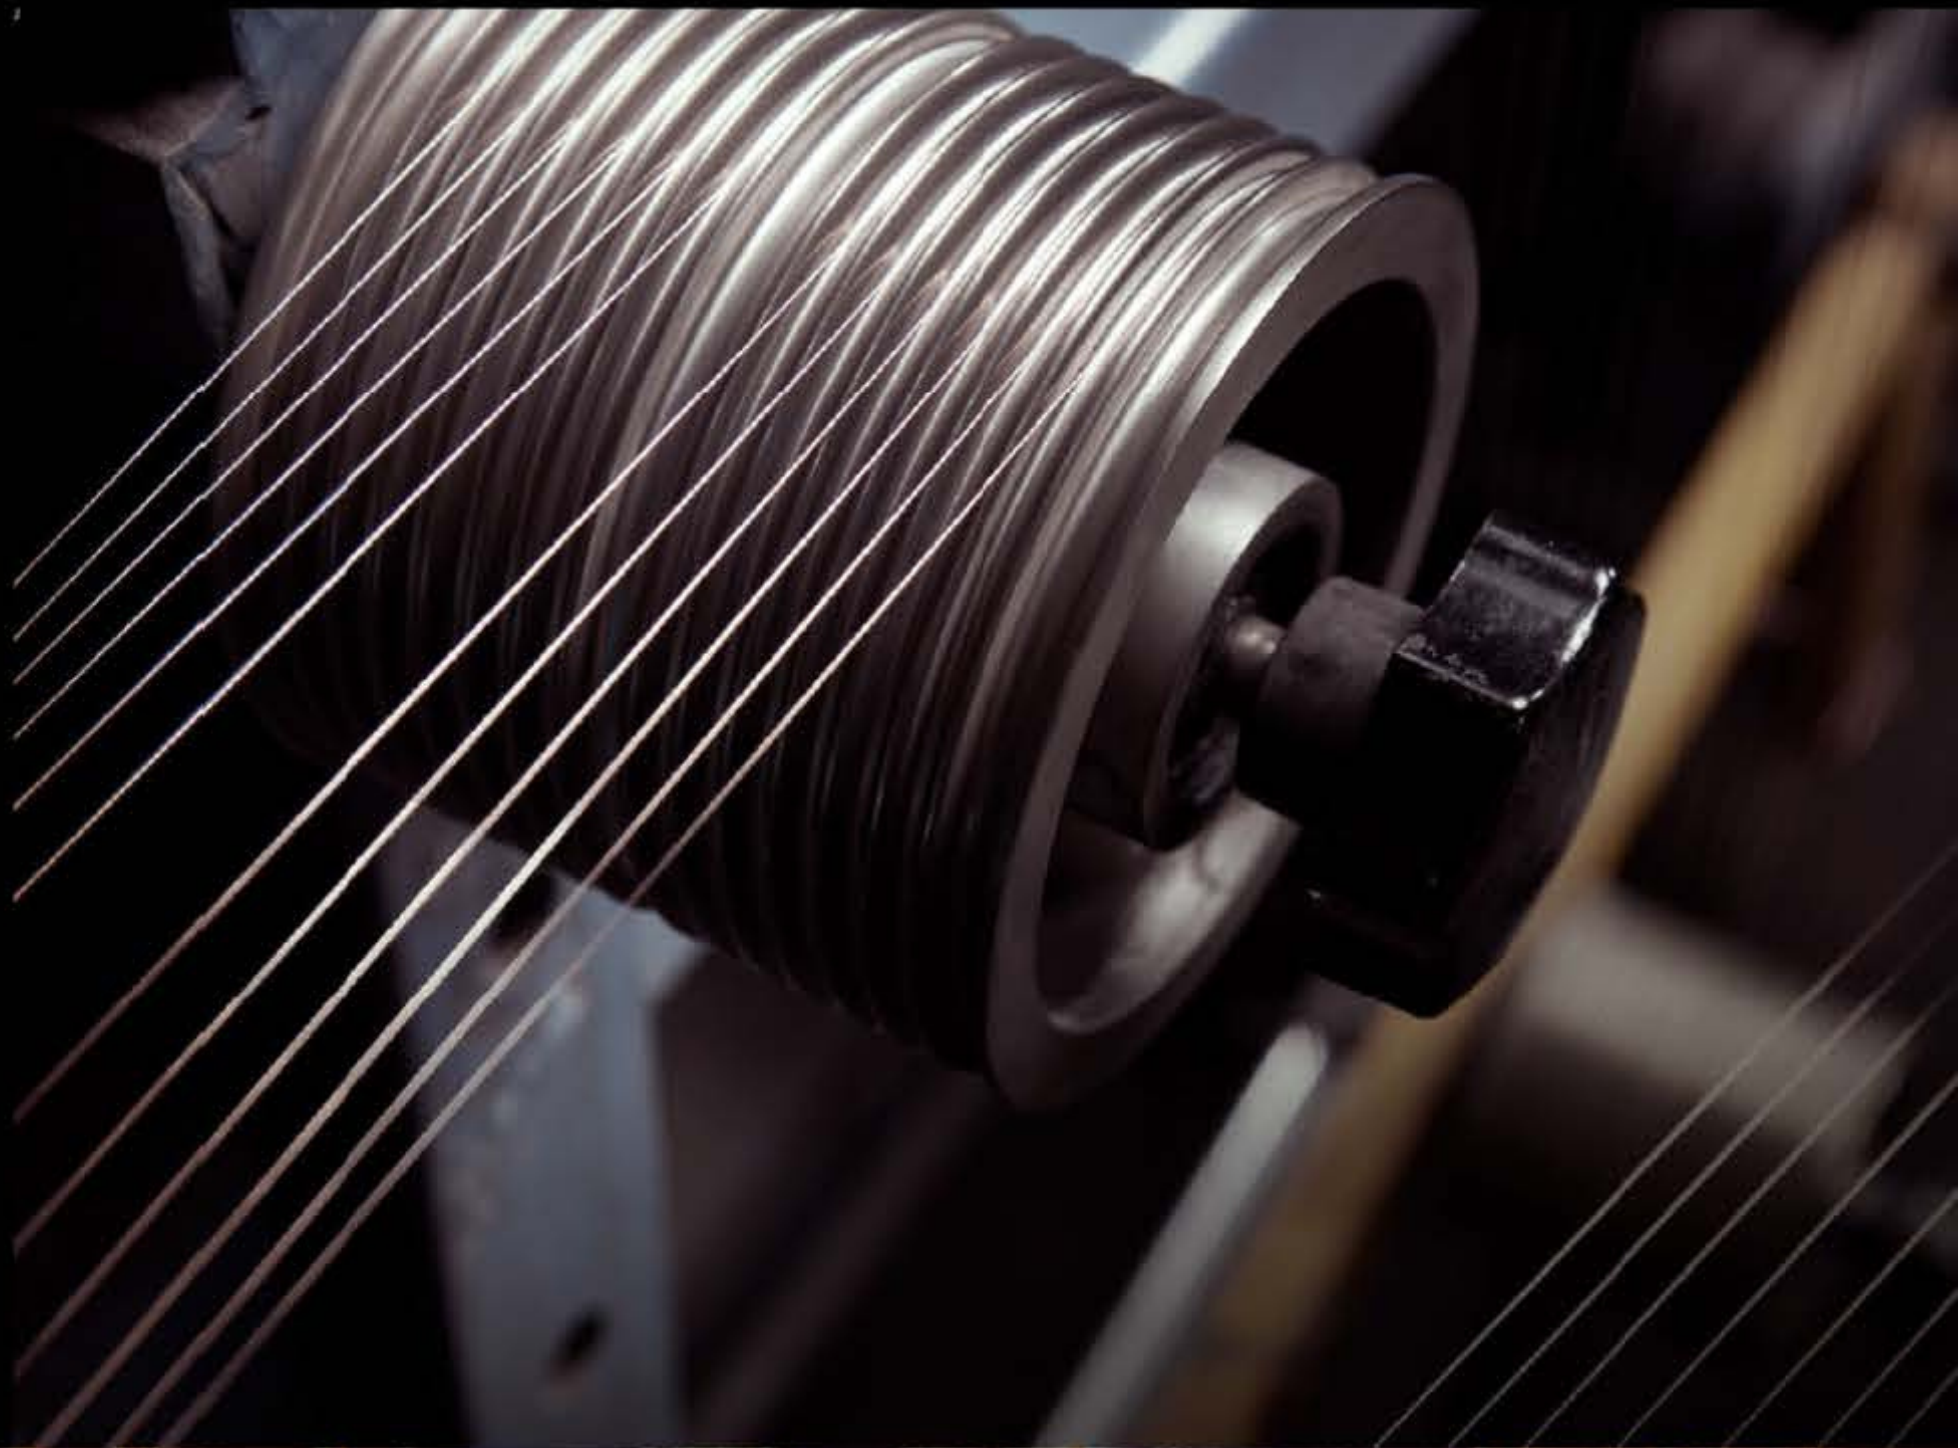

In the Mono wire drawing process, wire rods are redrawn at rod break down machines. These wires are also used as input wire in multi wire and tin plating machines.

	BARE	TIN PLATED
Diameter	44 AWG - 5 AWG (0.05mm - 4.50mm)	44 AWG - 10 AWG (0.05mm - 2.60mm)

MULTI WIRE

Input wires from Mono wire process are drawn with state-of-the-art technology in multi-wire drawing machines, afterwards they are dynamically or statically winded according to the demand.

	BARE	TIN PLATED	NICKEL PLATED
Diameter	44 AWG - 20 AWG (0.05mm - 0.82mm)	44 AWG - 20 AWG (0.05mm - 0.82mm)	38 AWG - 20 AWG (0.10mm - 0.82mm)

BUNCHED WIRE

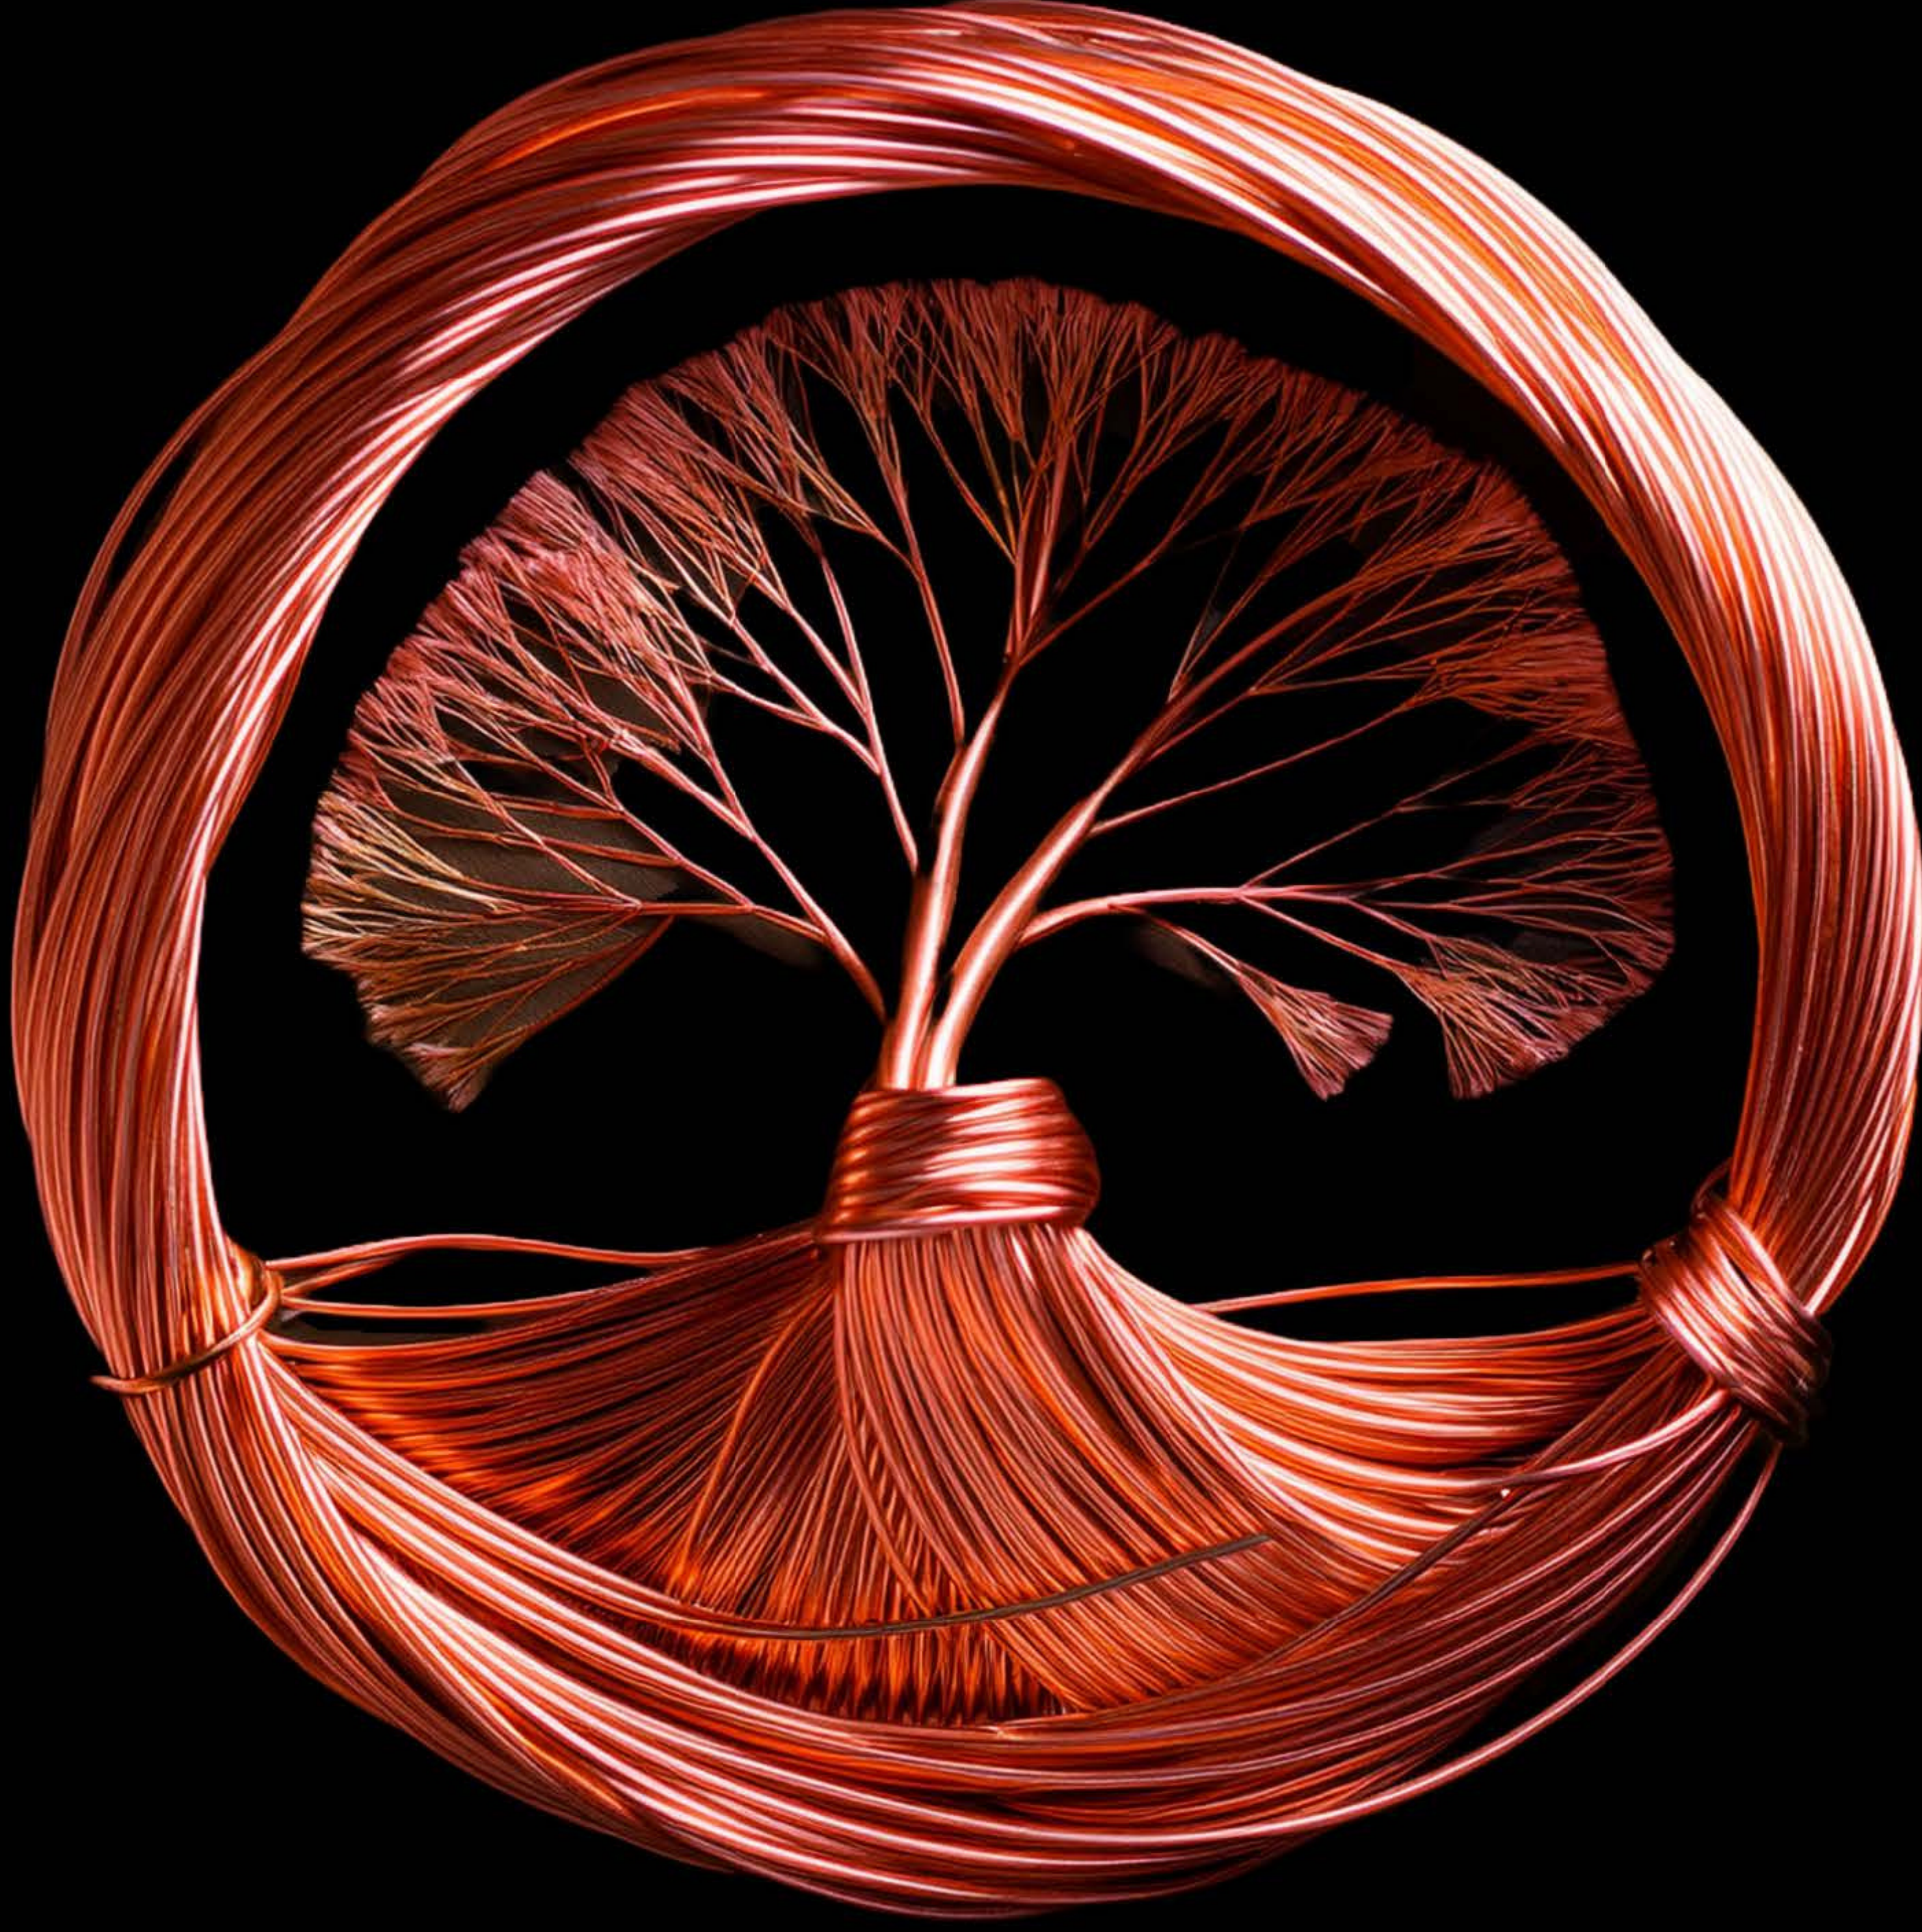

Produced in mono wire or multi wire drawing machines; bare, tin or nickel coated wires are stranded in Double Twist and Single Twist, stranding machines in accordance with the customer requirements and standards, in cross-section from 30 AWG to 4/0 AWG (0,05 mm² to 120 mm²) and geometric structures determined according to the place of use (normal twist, rope twist, unilay concentric twist, smooth bunch, etc.).

BRAID WIRE

Multi wires are winded in various types of bobbins in bobbin transfer machines.

Diameter	Max. 30 AWG (0.255mm)
Number of Wires	Max. 16
Packing	Produced on WS, WL and S3-2 bobbins and put into plastic boxes.
